

HP enables Israeli apartheid with critical technology for:

- Military checkpoints, which separate Palestinians from their jobs, land, schools, hospitals, and each other.
- Israel's racist ID cards system to enable discrimination in housing, employment, marriage, healthcare, education, and policing.
- Prisons where children and political prisoners are routinely tortured and held without charge.
- Illegal settlements built by force on stolen Palestinian land
- Israel's devastating and deadly naval blockade, which prevents adequate food, construction, and medical supplies reaching the people of Gaza.
